DATE: September 9, 2019  
TO: Board of County Commissioners  
FROM: IT & Emergency Mgt Greg Adams  
ITEM TITLE: SEPTEMBER 2019 IT/EM MONTHLY REPORT

### **Current Projects**

We have finished the After Action Reports for our two spring exercises and they are attached to this report. We will continue to train and exercise to better prepare for whatever disasters or emergencies we will face in the future.

At the last Response Agency Committee meeting we reviewed the currently used public alert and warning methods employed by the County and are looking to increase their use and adoption. We will continue to meet to review what we would like to have these systems become, to be the most useful for the community and will include Holly in these meetings.

### **Future Projects**

Clark County has asked me to present to their LEPC on cyber security on the 5<sup>th</sup> for 20 minutes.

I am continuing to work on the regional IT response and recovery planning workshop for the County, City, and School District IT administrators in our region and the agenda is coming together nicely. We will have speakers from as far away as New York, and everyone will be able to leave with a partially finished plan.

### **Future Appointments**

- 9/5 Clark County LEPC presentation on Cybersecurity
- 9/11 CERT class starting at Driggs Fire Station at 6 PM
- 9/18 State Cyber Workshop
- 9/19 Fremont County LEPC presentation on Cybersecurity
